Explanation of Incident Based Reporting (IBR) Arrest Data

The state program is now only accepting monthly crime data in the incident based format. Agencies submit their monthly data via Internet submission. The automated files are uploaded to the mainframe, run through an edit process, and sent to the central repository database. The IBR system requires that extensive data be reported for each crime occurring during a particular incident.

Information relating to two different levels of offenses is collected by the IBR system. The most serious offenses are designated as Group A offenses; the less serious offenses are designated as Group B offenses. Group A offenses consist of 22 different crimes involving 46 different offenses; a maximum of offenses per incident may be reported. There are 75 data elements for each Group A offense; however, all data elements are not required for each offense reported. Group B offenses consist of 12 crimes and require reporting only arrest data.

Some of the major benefits to be derived from the IBR system are greater specificity in reporting; more correlation between offenses, property, victims, offenders and arrestees; expanded victim/offender relationships; distinction between attempted and completed crimes; and increased reporting of various circumstances relative to specific crimes.

Please note this information is as of April 22, 2024.

Due to a new VSP IBR repository VSP are able to produce more timely and accurate data with each day.
